

# Maxwell Jones

Junior Web Developer

## 👤 About Me

Currently working in Film and Television. Externally, I have grown a large passion for the world of tech, with a particular interest in Web Development. The past year I have worked hard and built a diverse portfolio showcasing my self-taught skills in this field. I am now eager to grow my Web Development skills further in a professional environment.

## 📁 Experience

<https://ecommercestore-mj.netlify.app/>

An Ecommerce store with complete cart functionality (excluding payment implementation). Inclusive of React State and local storage for the cart system. This project allowed me to utilise my skills on React. Including State, custom Hooks and React-Router.

<https://mapboxweatherapi-mj.netlify.app/>

A Weather App that takes a destination (users' input) converting it to longitude and latitude. From here the information is then fetched from an API (temperature, location name etc) and returned on a map marker for display. Resulting in an easy, user-friendly platform that displays the exact weather forecast for the user's specified location.

<https://farrugiadesign.netlify.app/>

A website I created, for an interior design company. This project was my introduction to React and NPM modules. Some of these modules used for this project were Material UI, React Router DOM, SweetAlert, EmailJS and Slick Carousel.

## 📁 Current Employment

**Presentation Coordinator at Fox Sports, Sydney**

June 2018 — Present

Fast-paced, time-critical environment where we aim to deliver a multitude of LIVE sports from all over the globe.

- Within this role I have developed strong verbal and written communication skills
- Working both individually and alongside a team, problem solving and ensuring live broadcasts and worldwide televised events run without fault
- Constantly adapting to the implementation of new technologies (automation systems)

## Details

5 Lennox Street Gordon

Sydney, 2072

0452 494 959
